Subject: microsoft settlement

As a computer professional for thirtyfive years, I have been forced by dell, dale computers in michigan, and other vendors to purchase microsoft operating systems whenever I purchased a pc. This is not right. ms should be broken up as they are definately a monopoly or at lease prohibited from forceing their operating system on us through their predatory contracts with vendors. dennis skinner 810 227 4852 if someone wishes to discuss..
